

# Mad Science Summer Camp at Camp Topanemus

Exciting activities and spectacular demonstrations to capture the children's attention.

Each day campers will enjoy 3 hours of mad science fun and receive a take home experiment/project sheet to reinforce the camp's topic. Campers will participate in traditional camp activities in the afternoon.

## "Brixology 101" Week 3 (7/10-7/14) (grades 1-2) 9:00am-12pm

Brixology Camp sets the foundation for our next generation of makers! Children learn about different types of engineering and then team up to construct a different engineering-themed project using MAD SCIENCE EXCLUSIVE LEGO® bricks! They learn about aerospace engineering while assembling a space station. They explore mechanical engineering as they build boats and vehicles. That's not all from carnival rides to drawing machines, mechanical animals to truss bridges, your future engineer will build upon their creativity to solve real-world design challenges, while developing their problem-solving and team-building skills. Let the tinkering and building begin!

## Red-Hot Robots Week 4 (7/17-7/21) (grades 3-4) 9:00am-12pm

Spend this Summer playing with our super cool *Red-Hot Robots!* Discover the world of robots as we investigate the differences between humans and their robotic counterparts. Campers will learn how robots use infrared and other sensors to discover their environment. Invent your own robot designs using recycled materials. Finally - We use your hands-on skills to build your very own working Robot to Take Home to "LIVE" with You!
