

# Mad Science Summer Camp at Camp Topanemus

**Exciting activities and spectacular demonstrations to capture the children's attention.**

**Each day campers will enjoy 3 hours of mad science fun and receive a take home project/certificates to reinforce the camp's topic.**

## **Space: Infinity & Beyond Week 4 (7/15-7/19)** **(grades 3-4) 9:00am-12pm**

Children involved in this program will develop an interest for outer space or can expand a previous passion for our sensational solar system. Using the Scientific Method, campers will investigate the mechanics of unique flying machines, such as balloon-copters, boomerangs, and mini hovercrafts.

Children will be transported to the past as they delve into how early "pilots" navigated throughout space as they create their own sextant and sundial.

Building upon previous experiments and knowledge learned throughout the week, campers will use what they've learned to construct a model rocket and have the option of participating in a live launch demonstration.

**Come on a Journey to the Edge of the Universe!**
